April 23, 2020

Good afternoon,

Gonzales Healthcare Systems has recently had an employee test positive for COVID-19. The employee has been isolating at home, and other employees that they were in contact with have been sent home to quarantine for 14 days.

We take the wellbeing and safety of our patients and staff very seriously. We have been screening staff, patients, and visitors for several weeks, we have reduced the amount of visitors allowed in with patients, we have created outdoor triage areas for clinic and ER patients, all staff are required to wear masks or face coverings, and our team has been actively monitoring and preparing to manage the COVID-19 situation in our community. We are with you and we stand ready to care for our community.

We highly encourage you to continue to practice good hygiene habits – wash your hands often, avoid touching your face, cover any coughs or sneezes with a tissue and discard, sanitize highly used areas, and practice social distancing and wear face coverings when out in the public. Should you or someone in your family develop fever or respiratory symptoms, call your medical provider and follow their guidance.

Our community is strong, and we will weather this storm together and be stronger when it passes.

Thank you,

Patty Stewart, CEO
