

## NOTICE

The City of Smiley water department will be flushing lines this morning. Residents may notice changes in their water due to the flushing of lines. They will continue running the water until the flushing is completed. In most cases you will not notice any difference in your water, though there is a chance that you may have air in the water pipes or notice a discoloration of your water. The changes pose no health threat. The water department recommends you flush your cold water lines in your home or business.

Follow these steps:

- 1) Open your largest cold water faucet in your home (usually a bathtub) first and then move to opening your other faucets one at a time.
- 2) Let it run for 5 to 15 minutes, or until water runs clear.
- 3) If the water does not run clear, wait for about 20-30 minutes and flush the main cold water line again.

**\*\*Do not use discolored water for cooking, drinking, medical procedures and laundry.**

Please call Smiley City Hall at 830-203-8910 if discolored water persists or should you have any questions or need additional information. The office hours are Monday - Friday (except holidays) 8:00 am to 12:00 (noon). For after hour water and sewer emergencies ONLY call 830-263-8562.

Reminder...ALL questions, complaints or concerns should go through City Hall with our city secretary between the hours of 8:00 am to 12 (noon). Our city secretary will direct the issue to the appropriate department.
